

New products for 2018

We've had major success in the pet product market with our outstanding RAC pet travel range revolutionising the way we travel with our pets; ensuring maximum safety for dog and cat loving motorists. We have worked closely with RAC to ensure strict product quality and unique design features across our full range at an affordable price. Due to the growing demands of the pet owner we have been tirelessly working to expand our offering to include new range additions as well as update and enhance our best selling products.

Introducing to our range of products are 13 new products, each product has been tailored to be long lasting, easy to use and of great quality. The new additions include a new travel harness developed to ergonomically fit your pet to ensure comfort as well as protection when walking with your pet; our design will help to control pulling and remain reflective when used during long autumnal and winter walks, whilst the 4-point locking buckle secures your pet. Designed for your convenience our RAC fleece-lined weatherproof coat features a built in waste bag dispenser while our in-car additions are all machine washable as well as leak resistant to protect your car-upholstery.
